

# Listen up!

---

*Your ears could be telling you something*

## Did you know?

---

**40 Million** Americans have hearing loss

Source: <https://www.nidcd.nih.gov/health/noise-induced-hearing-loss>

## What causes hearing loss?

---

Hearing loss is caused by temporary obstructions in the outer or middle ear or permanent damage to the tiny hairs in the inner ear. **Common causes of damage include exposure to noise, aging, other health conditions, and certain medications.**

## When should I get my hearing checked?

---

Hearing loss can come on gradually. You may not even notice it's happening. If your hearing test reports your hearing is OK, stick to once every three to five years. You should test your hearing more often if you are 55 or older or are experiencing any of the following:

- **Consistent exposure** to loud noises
- **Difficulty understanding** in noisy environments or in groups
- **Hearing mumbling** or feeling as though people are not speaking clearly
- **Ringings** in your ears
